

Knead form Anti-Static agent for PP
ANSTEX SP-151

1. Features

SP-151 is newly developed and use for PP including injection molding, films and sheets of Automobile industry.

- (1) no interfere with transparency of molding
- (2) good thermal resistance
- (3) effective with a small additive amount

2. Physical properties

- (1) Appearance : light yellow pellet
- (2) Ingredient : Polyalcohol Fatty Acid Esters
- (3) Active Ingredient : $\geq 99\%$
- (4) Melting Point : 60°C

3. Usage & Additive percentage

Normally make anti-static master-batch or compound and standard addition as below:

PP resin: 0.3~0.8% PHR

4. Packing

20kgs /carton box (inner PE bag)

Manufacturing by: Toho Chemical Industry (Japan)
